

Site Hosting Options

Wendt Partners clients should select a third-party hosting provider based upon the following requirements. Wendt Partners does not host sites internally. All information presented is subject to change. Before selecting a provider, please verify specifics with us.

Site Hosting Requirements

The following site hosting requirements are applicable to websites supported by our weCMS™ content management system, built on top of the WordPress framework:

- LAMP System (Linux, Apache, MySQL and PHP)
- PHP 5.2.4 or greater
- MySQL 5.0 or greater
- mod_rewrite Apache module
- suPHP installed and configured
- DNS activation required for http://, www and admin. subdomains

Site Hosting Providers

The following hosting providers offer packages that are compatible with our requirements:

Standard Sites:

- **BlueHost** - Linux Pro with Dedicated IP and Backup
- **HostGator** – Linux Business with Dedicated IP and Backup

Advanced Sites:

- **Servint.net** – Flex VPS or Flex Dedicated Server
- **Rackspace Hosting** – Dedicated or Cloud Server

Third-Party Services

The following third-party services are commonly utilized for our client web engagements:

- **Blog Engine:** WordPress or HubSpot
- **E-Commerce:** Authorize.net or PayPal Website Payments Pro
- **Video & Social:** Vimeo, Viddler, YouTube, Twitter, Facebook, LinkedIn, etc.
- **Web Conferencing:** Cisco WebEx and Citrix GoToMeeting
